PROJECTS

Library Management System

Library management systems are designed to manage the movement of books and maintain records of the members in a library. The software solution is designed based on the system requirements, the people involved, the content of the operation and the activity to be performed.

Online quiz project

It provides a common platform to connect student and teacher online. The registered teacher can create Quiz and student can take quiz and can asses himself/herself.

Scientific Calculator

A Scientific Calculator is a very powerful and general purpose calculator. In addition to basic arithmetic functions, it provides trigonometric functions, logarithms, powers, roots etc. Therefore, these calculators are widely used in any situation where quick access to certain mathematical functions is needed.

Online Stadium ticket booking system

Online Stadium Ticket Booking System, web application, designed by me using PHP as backend and MySQL as database. This is my college major project.
